

Impact and Sustainability of Sports Premium Funding 2019-2020

Impact

- Staff feel increasingly confident teaching P.E because of Sports Coaches employed to deliver high quality P.E lessons in all key stages. In terms of most recent times, staff have been well equipped with resources to offer high quality PE teaching through remote learning platforms.
- Increase in awareness of Health and Well Being across school, continuation of fruit for all year groups and clubs focussed on keeping active and eating choices introduced, extra focus on Mental Health and well being for those both remote learning and at school.
- A further increase in attendance at local cluster competitions, which in turn has led to further success and representation at higher level events. Some of this has been completed virtually due to Covid -19.
- The continuation of a new partnership with a local community sports facility to engage those less interested children and create lasting links for the children from our school. This is in place and ready to continue when appropriate.
- A range of individualised equipment used on the yard at break times and lunchtimes to engage the children in the 30 minutes physical activity target.
- Contributing towards a P.E Level 2 Teaching Assistant to support in P.E lessons, at break and lunch times and after school and to enable a higher participation in external sporting events.
- The creation of a 'Sports Crew' who have received training and equipment to enable them to support activities for their peers.

"The primary physical education and sport premium grant is used effectively to extend pupils' opportunities for sport and physical development. Specialist coaches provide good teaching for pupils and useful training for staff. Outdoor equipment to promote pupils' physical skills has been improved. Pupils' participation in sporting activities and in local competitions and tournaments has increased." Ofsted (February 2016)

Sustainability

- Further large investments have been made in resources and will be ongoing to engage the children in the curriculum and in the up-skilling of staff to ensure that we see an impact throughout school in years to come.
- Implementation of whole school PE Planning and Assessment to allow for the longevity of quality PE lessons and accurate assessment.
- The continuation and development of a strong partnership with local community sports complex to ensure new opportunities and

experiences for both staff and pupils and to create community links that will extend to out of school activities for our children.

-Structures in place to ensure that teaching can still be of high quality when children are having to remotely learn away from the school setting.
